

ArcSoft WebCam Companion

Description: ArcSoft WebCam Companion is software that allows you to use your laptops web cam to record video and still pictures.

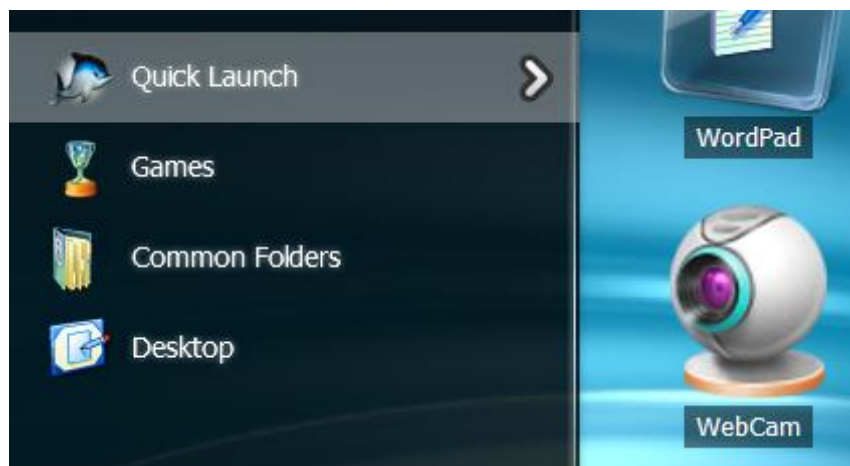

System Requirements: Built in web cam on laptop.

Installing ArcSoft WebCam Companion:

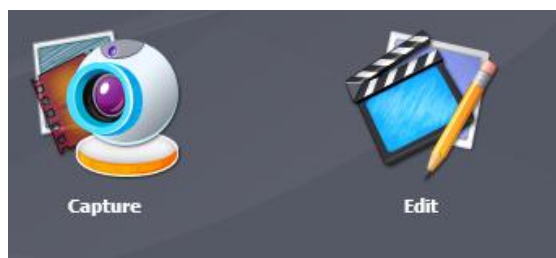

1. Installation is not needed for ArcSoft WebCam Companion as it comes on your laptop.
-

Using ArcSoft WebCam Companion:

Go to the Quick Launch menu on your laptop and click on WebCam.

When you open the program, you'll have the option to capture or edit a picture. Start with Capture to take a picture or video.

Setup your picture and click the camera icon circled below to capture your image.

- 1) Change the quality of your picture to get more detail.
- 2) Adjust the lighting and quality of your video settings.
- 3) View the WebCam Companion in full screen.
- 4) Turn off the WebCam.
- 5) Take a picture.
- 6) Take a batch of pictures. This will take one picture every second until you stop it.
- 7) Record a video.

After taking your picture, you can edit it. Click the edit tab (in blue) to bring up the editor. You can adjust brightness, contrast, flip, resize or crop your picture.

When you take a picture it is automatically saved to your computer. To use your picture in another application, you can find it in your WebCam Media/Capture folder. You can also use "Save As" and pick where to save your picture.
