

Wallwisher

www.wallwisher.com

Description: Wallwisher is an online notice board maker. It is ideal for making announcements, wishing people, keeping notes, and things you can do with Post-its.

System Requirements: Firefox, Safari, Internet Explorer or Chrome web browser. 128MB or more RAM.

Signup Requirements: You register for an account as you build your "wall" on www.wallwisher.com. You can then use that login (which requires a valid email address) to keep track of your notices and posts.

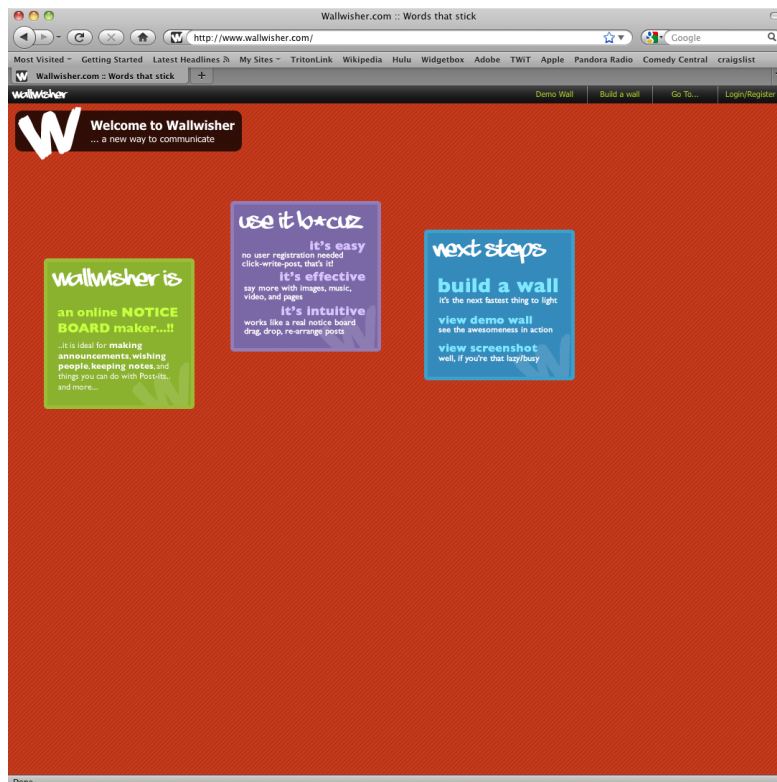

Installing Wallwisher:

1. There is no installation required, Wallwisher uses Javascript in the browser.
-

Using Wallwisher: Below are a few points to get started

First, go to www.wallwisher.com

From the homepage, you will click "Build a Wall" in the blue box.

From there, you are taken to your wall. You can then customize the background color/pattern, the wall title and subtitle, a wall icon, and the url address. You will also create your login name and enter your email address at this screen.

Earth Notepad Wood

done

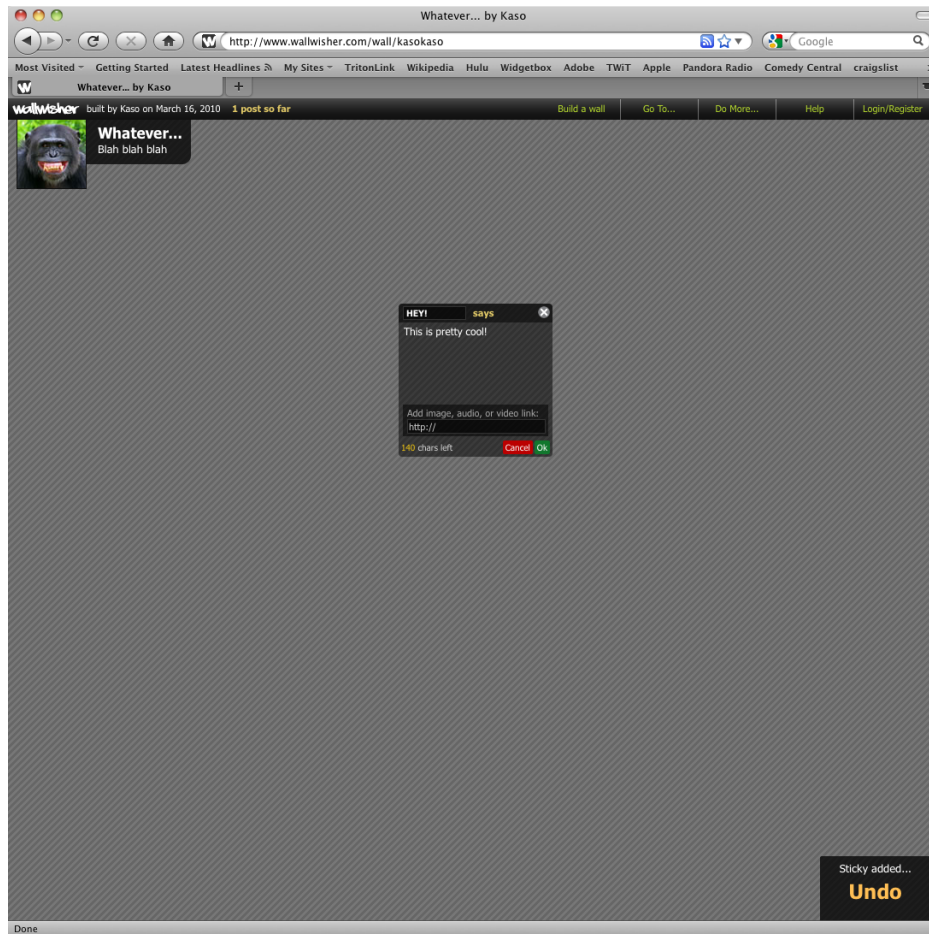

You can choose between a few stock icons, or submit your own image, for your wall's icon.

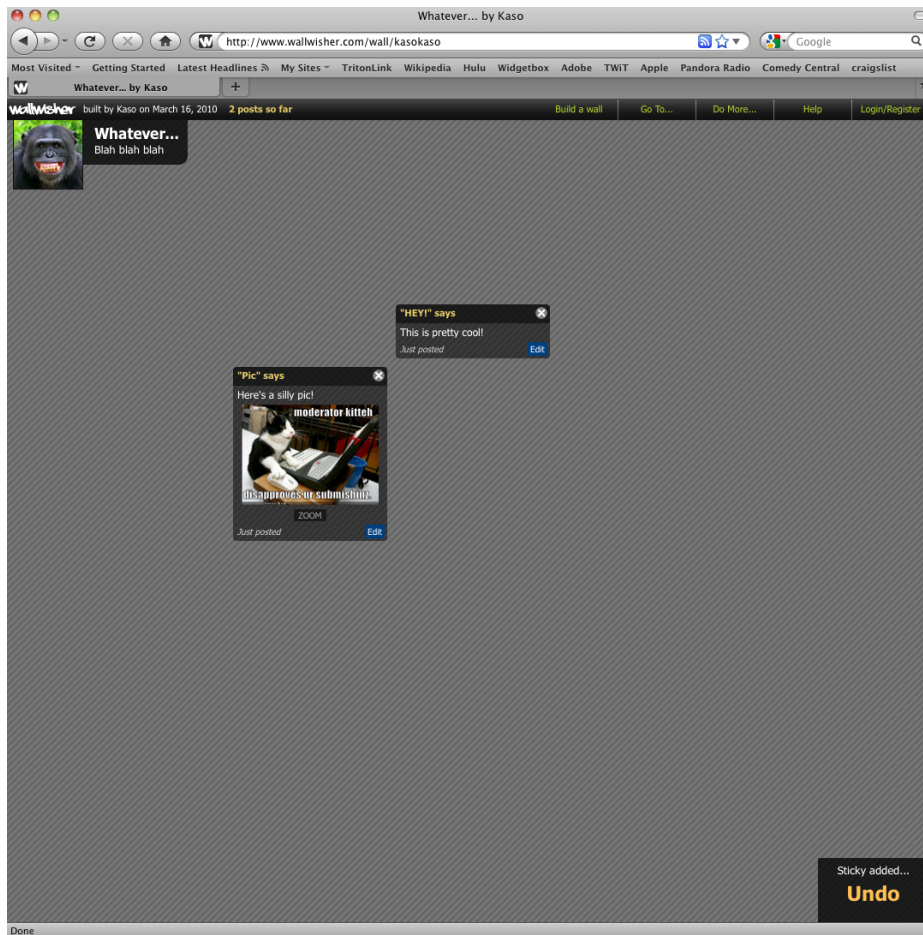

After you are done filling in the information, click the big “Done” button in the lower right-hand corner.
You are then taken to your new wall.

Double-click anywhere on the screen to post a new note. A window will popup, where you will fill in a title, a message, and the url of an image if you so wish. You can Undo any post by clicking the “Undo” button in the bottom right-hand corner.

When you are done with your post, click "OK". And that's it! You now have your own wall!

If you so desire, you can turn your wall into a RSS feed. Click "Do More...", then "RSS". You can transfer this RSS feed into any blog or site.
