

The Intel® Teach Program is part of the Intel® Education Initiative, a sustained commitment to prepare students with the 21st century skills they need to thrive in the knowledge economy. The Intel Education Initiative offers free programs and resources for K-12 educators, higher education, and community education for youth.

Intel® Teach Elements is a series of compelling, short professional development courses that provide deeper exploration of 21st century learning concepts, such as Project-Based Approaches, Assessment of 21st Century skills, or Collaboration with Web 2.0 Tools.

Intel Teach Elements: Project-Based Approaches Course

The first course in the series, Project-Based Approaches, helps teachers improve their understanding and application of project-based approaches in the 21st Century classroom.
