Corrections in this release

<i>TR 1604</i>	<i>APP Server didn't recover from Advance Power Management mode... 1</i>
<i>TR 1665</i>	<i>Username field did not work in APP Server for Win 95..... 1</i>

- TR 1604* APP Server didn't recover from Advance Power Management mode.
- Running 2.0b software: APP Server 2.0b didn't work after a suspend/resume operation. The APP Server had to be deactivated first, then reactivated before APP Server worked correctly.
- TR 1665* Username field did not work in APP Server for Win 95.
- Running 2.0B software: Using RADIUS, the user was able to enter anything in the username field of the APP Server.
